

coagulants, anti-coagulants, snake venoms, analeptics, rutin, folic acid, thiouracil, and propyl-thiouracil, anti-biotics, the sulfa drugs, the cardiac glycosides, mercury diuretics, as well as B. A. L. treatment and gold treatment for arthritis. The author discusses alcohol and tobacco in detail. Certainly, it would be commendable for every physician to review such discussions as tobacco and alcohol

and apply them to his everyday practice.

The author also discusses the hormones and the heavy metals in a most interesting fashion. A short chapter is devoted to prescription writing, which has become a lost art.

This book is a valuable reference work, serving not only as a refresher course in the older drugs but also brings one up to date on the new drugs.

DELAWARE STATE MEDICAL JOURNAL

VOLUME 19—1947 INDEX TO TITLES AND AUTHORS

- | | | | |
|--|-----|--|-----|
| ADAMSON, WILLIAM C.: Group Psychotherapy | 94 | Cancer Control: Detection Center [John F. Hynes] | 163 |
